

WHEEL REFURBISHMENT

Discover the Protech Group's range of functional and aesthetic powder coatings specifically engineered for wheel refurbishments. Our high-quality products consistently meet and exceed OEM specifications, ensuring durability and a flawless finish.

EF33-S is a modified epoxy primer, providing an exceptional smoothness, levelling and substrate wetting with excellent corrosion protection, mechanical properties and adhesion with the topcoat.

PE60 is a high gloss polyester clearcoat for interior and exterior applications, showing an exceptional smooth aspect with excellent clarity.

On the following page, you will find a selection of in-stock products ready for delivery within 24 - 48 hours, depending on your location. Additionally, all products are available in various colors and textures upon request.

Please note: The images in this brochure display panels coated with our powder coatings. Variations in lighting may affect the perceived color. We are happy to provide test panels for a more accurate representation.
