

PS Series

Solvent-Based Polyester Liquid Coatings

Strong Bond. Superior Protection.

PROTECH
— GROUP —

Overview

Solvent-based polyester coatings provide a durable, high-gloss finish with strong adhesion and fast drying. Suitable for spray, dip, or brush application, they work well in multi-layer systems and are offered in solid and metallic finishes. The PS Series delivers enhanced chemical resistance and film quality, making it ideal for demanding industrial, architectural, and transportation uses. Available in both direct-to-metal and multi-coat options to suit various application needs.

Main Features

- Versatile Finishes – Tintable bases in gloss, semi-gloss, and satin
- Heat Resistant – Maintains color and gloss up to 400°F
- Specification Compliance – Meets AAMA 603.8 and CGSB 1-GP-300 (select versions)
- Surface Protection – Additives available for mar, scratch, and stain resistance
- High-Build – Supports thick applications without film failure

Common Uses Include

- Structural components
- Trailers and heavy metal application
- Railcars
- Underbodies
- Metal doors and curtain wall systems

Typical Properties

Coating Options	Primer, Top Coat or Direct to Metal (DTM)
Cure Options	Bake
Application	Roller/Brush or Spray
Substrates	Metal, Plastics
Gloss Range	Low to High Gloss
Solution-Specific Coatings	PS1 Direct to Metal Coatings (1K) PS2 Polyester Coatings (2K)

Consistent Quality. Proven by Performance.

At Protech Group, quality isn't just a feature—it's a promise. Our coatings are engineered to deliver consistent performance across every application, ensuring reliable results and a flawless finish each time. With rigorous quality control and decades of technical expertise, we maintain the highest standards from formulation to final product. Whether you're coating complex parts or high-volume assemblies, you can count on Protech for dependable performance and superior, long-lasting quality.

Custom Formulations

Leveraging decades of experience, The Protech Group partners with you to create tailored coating formulations that meet your unique application, budget, and production needs.
